

Appl. No. 09/683,647
Amdt. dated July 27, 2005
Reply to Office action of June 15, 2005

Amendments to the Specification:

Please replace the abstract with the following amended paragraph:

5 A data transmission circuit has an internal circuit for providing data, a register electrically
connected to the internal circuit for temporarily storing the data transmitted from the
~~input~~ internal circuit, and a control circuit for controlling operations of the data
transmission circuit. If data inputted to the register is specific data, the internal circuit will
repeatedly output the specific data to the register so as to prolong transmission time of the
specific data.
